NAZIS DIVE-BOMBING BRITISH AT 4 PORTS

Fresh Troops Arriving to Help Break Flanders Trap; French Squeezing Gap

WASHINGTON, D. C., SATURDAY, MAY 25, 1940-THIRTY-FOUR PAGES.

Destruction of Surrounded Army Within Week Forecast by Berlin

Breach Now Only 20 Miles Wide, **Paris Says**

BULLETIN.

BERLIN (AP) .- German and Allied troops fought today in the streets of Calais, just 22 miles from England, while Adolf Hitler's dive bombers rained destruction on four Channel harbors, where the British apparently are attempting to land reinforcements to break the trap around Allied Armies in Flanders.

dive bombers dropped explosives on harbors at Dieppe and Dunkerque, France, and Ostend and Blankenberghe, Belgium. The last port is a famous sea

By the Associated Press.

The French battled today to close the German gap in Allied lines in the Peronne-Bapaume as authorized German sources said that the British-French-Belgian Armies, now encircled in Northern France and Belgium, would be "wiped out" within a week.

The German high command said the Allied Armies in Flanders had been completely encircled yesterday, and the authorized Berlin sources said the lightning stabs of Adolf Hitler's legions had reduced the area of the Flanders battleground by two-thirds in 48 hours.

The French said that the breach in the Allied lines had been reduced yesterday from 30 or 35 to about 20 miles in width, but admitted that German units were still pouring through to the coastal plain.

Nazi Advance Declared Checked. The Nazi advance in the St. Amer region has been checked, however, a French military spokesman asserted, and the whole front is "without change." The situation at Boulogne

was termed "unchanged." Nazi forces driving through Flanders, it said, completed the encirclement operation vesterday, captured the important English Channel port of Boulogne, the Belgian cities of Ghent and Courtrai and crossed the

Beware of False Orders, Reynaud Tells French People

PARIS, May 25.—Premier Reynaud cautioned the French people today to beware of false orders which, he said, German agents are spreading by telephone and handbills with signatures of French officials-some-

times even his own. Warnings also were issued against alleged German propaganda efforts to divide France and Britain.

GERMANS TRY TO CLOSE AN IRON RING-German Armies pointed north in France and west from Belgium today, trying to complete an iron ring around Great Britain that begins in Norway and continues down the North Sea coast. British sought spies in Ireland (1) and watched the Irish Sea approach. German planes bombed the Eastern English coast (2), and sounds of battle were heard off Channel ports (3). The French claimed advances in the Somme region (4). A thundering artillery battle was reported on the Rhine (5) only 5 miles from the Swiss border. Italy was mobilized (6), but war remained a Mussolini question mark. . -A. P. Wirephoto.

Roosevelt Maps New Defense Organization

Setup to Include **Experts in Various** Fields

By JOHN C. HENRY.

President Roosevelt will create a national defense emergency co-ordinating group, it was announced at the White House today, to represent a cross-section of all American interests in the mobilization program now contemplated.

Substantiating, in effect, an Associated Press dispatch early today that the administration contemplated establishment of a national defense council, official announcement of the President's present plan was made by Stephen T. Early, sec-

The administration intention, Mr. Early said, is to call in experts from every avenue of the Nation's life. including such as transportation, communications, finance, agriculture, labor, consumer groups and

Details Not Decided.

Joining these authorities from private enterprise will be experts now in Government service, the whole to form a consulting and supervisory organization which will function in conjunction with development of the defense program. Mr. Early emphasized that it is not the President's plan to supersede any existing Government machinery by this proposed co-ordinating group, but rather to draw into a more efficient performance all parts

of the mobilization machine. President has decided on the manner in which he wants to approach the problem, but has not fixed on the details, the identities of those who will be asked to participate, or the titles to be involved. Throughout its operation, the plan is to be kept flexible and very elastic, Mr. Early said, so that it may be adapted

to rapidly-changing conditions. Memoranda on the project already are being prepared by the President's governmental advisers and likewise have been requested of out-

side authorities Mr. Early stressed that the primary objective of the plan is to stabilize American life in the face of extraordinary demands and conditions which may arise out of Europe's war. In other words, the secretary explained; with this Nation engaged in a major defense effort, the President is anxious to prevent prices from soaring, to assure producers of reasonable profits and otherwise to forestall so far as possible the highs and lows that

prevailed during the World War. Through the proposed group, Mr. Early concluded, the President hopes to accomplish a complete coordination of Government and American life.

Turns Attention to Address. While this project is being slowly shaped up in the minds of administration advisers, President Roosevelt today turned his own attention entirely to preparation of his radio "fireside" address tomorrow night. Scheduled for both domestic and international broadcast at 9:30 o'clock, the speech will be Mr. Roosevelt's first such personal report to the country since last September 3. the war, the Chief Executive promwith the experiment so that the ised the Nation there would be no

ened, he sought out his keeper, Malcolm Davis, and leaned against him, as if asking for help. But there was little Mr. Davis could do, although the two had been through much together—on a blizzard-swept ice barrier in the Antarctic last January, when Mr. Davis captured the lone Emperor.

Antarctic expedition's supply ship North Star, beating through a polar storm to Valparaiso, Chile. The tall Emperor penguins are valuable birds which dwarf lesser species and are almost unknown in captivity. Rear Admiral Richard E. Byrd brought a half a dozen back from a previous expedition to the Antarctic and all died shortly after they were landed in this country. Rare and highly-prized as the birds are to zoologists, no one knows how

Dugan yesterday was breathing little destruction and apparently no hard, his muscular white and new casualties to the 249 dead and orange-feathered chest heaving, and his long black beak gasping for air. He apparently was suffering from some fungus growth which was closing his wind pipe. He kept crowding closer to Mr. Davis, burying his head against the keeper's chest, as if frightened that the man would leave him. Dugan was a great favorite with Zoo attendants, who took turns feeding him by hand—and with the public as well. Word spread that the Emperor was dying, and people were sorry to
